## SUMMARY

Dedicated and results-oriented data engineer with 5 years of experience designing, implementing, and maintaining robust data pipelines and architectures. Proficient in using a variety of technologies, including [mention relevant programming languages, tools, and frameworks such as Python, SQL, Apache Spark, Kafka, etc.], to transform complex datasets into actionable insights.

I possess strong problem-solving and analytical skills, a passion for learning, a sense of responsibility, and the ability to collaborate effectively as a team player.

**Projects**

- Real-time Data Streaming Pipeline for IoT Devices
- Enterprise-Wide Observability and Alerting Platform using Prometheus, Grafana, and InfluxDB
- Real-time Data Streaming and Analytics System using Kafka and Spark and ClickHouse
- Autonomous Driving Data Orchestration Platform and Machine Learning Pipeline using Apache Airflow and MLFlow
- Distributed Logging and Search System using Elasticsearch
